Trans. of Teploenergetika (USSR) 1958 [v. 5]
 no. 4, p. 63-68.

The paper presents a theoretical calculation of the
 heat exchange in the turbulent flow through pipes of a
 liquid with constant physical properties. The problem
 of the effect on the heat transfer of a variable viscos-
 ity is examined on the basis of experimental results.
 A formula for such calculations is put forward.
